WHAT IS

Priosa® clean in detail

What is Priosa® clean?

Priosa® clean is a nutrient complex containing sulfur-bearing amino acids, MSM, SOD and vitamins. Sulfur is involved in a variety of processes and is found, for example, in enzymes, in skin cells, in hair, in vitamins B1 and B7, or in hormones such as insulin. The sulfur content that is not consumed for the rebuilding of the body's own proteins can therefore serve as an important sulfur donor in almost every organ. It is particularly beneficial in the liver with its cleansing enzymes, muscles and tendons. The non-animal L-methionine contained in Priosa® clean is an essential amino acid (AA) that cannot be produced by the human body itself and must therefore be obtained through food. As a methyl group donor, L-methionine plays an important role in many metabolic processes and is the starting amino acid for every protein. Glutathione, L-cysteine, creatine and melatonin also depend on this AA. L-methionine influences numerous body functions. Adequate intake is of crucial importance for the human organism. To meet the high demand, Priosa® clean contains a high amount of L-methionine. In combination with the amino acid L-cysteine and the most important coenzymes of sulfur metabolism – vitamin B6, B12, folic acid and pantothenic acid – the high biochemical bioavailability of L-methionine is ensured.

WHAT PRIOSA® CLEAN SUPPORTS

The most important of the 21 areas of effect

The vitamins and minerals contained contribute to the following body functions in accordance with EU-approved health claims.

Homocysteine metabolism

Folate contributes to normal **homocysteine metabolism**.

Amino acid synthesis

Folate contributes to normal **amino acid synthesis**.

Cysteine synthesis

Vitamin B6 contributes to normal **cysteine synthesis**.

WHAT CAN

What the nutrients in Priosa® clean contribute to

- Folate contributes to maternal tissue growth during pregnancy.
- Folate contributes to normal blood formation.
- Folate contributes to normal psychological function.
- Folate contributes to the reduction of tiredness and fatigue.
- Pantothenic acid contributes to normal energy-yielding metabolism.
- Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.
- Selenium contributes to normal spermatogenesis.
- Selenium contributes to the maintenance of normal nails.
- Selenium contributes to the normal thyroid function.
- Vitamin B12 contributes to normal energy-yielding metabolism.
- Vitamin B12 contributes to normal homocysteine metabolism.
- Vitamin B12 contributes to normal red blood cell formation.
- Vitamin B12 contributes to the reduction of tiredness and fatigue.
- Vitamin B6 contributes to normal cysteine synthesis.
- Vitamin B6 contributes to normal functioning of the nervous system.
- Vitamin B6 contributes to normal protein and glycogen metabolism.
- Vitamin B6 contributes to normal red blood cell formation.
- Vitamin B6 contributes to the reduction of tiredness and fatigue.
- Folate contributes to normal amino acid synthesis.
- Folate contributes to normal homocysteine metabolism.
- Folate contributes to the normal function of the immune system.
- Folate has a role in the process of cell division.
- Pantothenic acid contributes to normal mental performance.
- Pantothenic acid contributes to the reduction of tiredness and fatigue.
- Selenium contributes to the maintenance of normal hair.
- Selenium contributes to the normal function of the immune system.
- Selenium contributes to the protection of cells from oxidative stress.
- Vitamin B12 contributes to normal functioning of the nervous system.
- Vitamin B12 contributes to normal psychological function.
- Vitamin B12 contributes to the normal function of the immune system.
- Vitamin B12 has a role in the process of cell division.
- Vitamin B6 contributes to normal energy-yielding metabolism.
- Vitamin B6 contributes to normal homocysteine metabolism.
- Vitamin B6 contributes to normal psychological function.
- Vitamin B6 contributes to the normal function of the immune system.
- Vitamin B6 contributes to the regulation of hormonal activity.

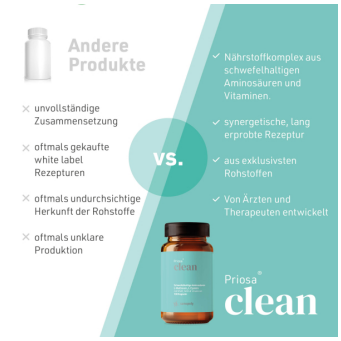

INSIGHTS

MANUFACTURING & QUALITY

Tested quality

Sanopoly develops highly pure nutritional supplements in medically supervised formulations. Production takes place in Austria at an established pharmaceutical contract manufacturer with over 25 years of experience.

ISO 22000

Certified management system for food safety according to international standard.

DEKRA tested

Independent audit of complete quality management by DEKRA.

Laboratory tested

Testing of the ingredients for heavy metals and microbiological purity.

INGREDIENTS

Nutritional values and ingredients

Nutrients	per daily dose * (= 2 Capsules)	% NRV **
Vitamin B6	0.7 mg	50
Folic acid (Vitamin B9 / B11)	900 µg	450
Vitamin B12	160 µg	6400
Pantothenic acid (Vit. B5)	5 mg	83
Selenium	70 µg	127
L-Methionine	300 mg	–
L-Cysteine	40 mg	–
MSM	50 mg	–
Mineral powder	30 mg	–
Soya lecithin	135 mg	–
Phosphatidylcholine	40.5 mg	–
Melon fruit juice concentrate (SOD)	40 mg	–
SOD	480 IU	–
Chlorella microalga	30 mg	–

** per daily dose ** % NRV = nutrient reference values according to Regulation (EU) No 1169/2011. Vitamins and minerals below 15 % NRV are not listed.*

Recommended intake
2 capsules

Ingredients
L-Methionine, Pullulan (capsule shell), Soy lecithin, L-Cysteine hydrochloride, Methylsulfonylmethane (MSM), Melon fruit juice concentrate, fermented Chlorella vulgaris powder, Priosa PURE BASIS mineral powder, Sodium selenite, Sodium chloride, Calcium D-pantothenate, Rice protein powder, Pteroylmonoglutamic acid, Pyridoxine hydrochloride, Hydroxocobalamin.

Notes
Do not exceed the stated recommended daily intake. Food supplements are not a substitute for a varied diet. A balanced diet and healthy lifestyle are important. Keep out of reach of small children. Store at room temperature (max. 25 °C), dry and protected from light. Use within 3 months of opening the packaging.* Moisture-sensitive product. Do not remove the enclosed desiccant sachet. The desiccant sachet is not suitable for consumption.
* Exceptions are packaging units whose daily dose and sales quantity require intake over a longer period.
