PRODUCED IN EUROPE

THE FORMULA

The formula of Priosa® beauty

Vitamin E + Biotin and Zinc, Coenzyme Q10 and Silica, Nutrient Complex for Skin

13	30	26
Ingredients in the formula	**EU-approved health claims**	**Areas of effect according to approved claims**

WHAT IS

Priosa® beauty in detail

What is Priosa® beauty?

Priosa® beauty is a vital nutrient mix tailored to the diverse functions of the skin. Zinc plays a role in cell division. Due to its complex structure with firm and elastic fibers, the lymphatic system and fatty and epithelial tissue, the skin requires not a mono-, but a complex supplement.

With its multiple combination of amino acids, vitamin B5, silica, evening primrose oil, Q10 and biotin, Priosa® beauty promotes the maintenance of skin, hair and nails. Your diet is optimally supplemented with the most important skin-building blocks.

WHAT PRIOSA® BEAUTY SUPPORTS

The most important of the 26 areas of effect

The vitamins and minerals contained contribute to the following body functions in accordance with EU-approved health claims.

Hair
Biotin contributes to the maintenance of normal **hair**.

Skin
Biotin contributes to the maintenance of normal **skin**.

Mucous membrane
Biotin contributes to the maintenance of normal **mucous membranes**.

Nails
Zinc contributes to the maintenance of normal **nails**.

Cell division
Zinc has a role in the process of **cell division**.

Oxidative stress
Vitamin E contributes to the protection of cells from **oxidative stress**.

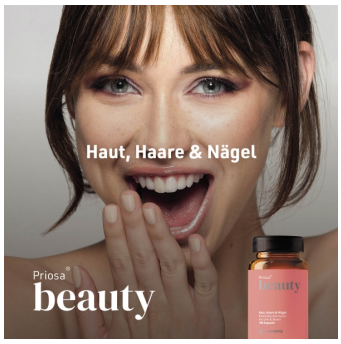

WHAT CAN

What the nutrients in Priosa® beauty contribute to

- Biotin contributes to normal energy-yielding metabolism.
- Biotin contributes to normal macronutrient metabolism.
- Biotin contributes to the maintenance of normal hair.
- Biotin contributes to the maintenance of normal skin.
- Pantothenic acid contributes to normal mental performance.
- Pantothenic acid contributes to the reduction of tiredness and fatigue.
- Zinc contributes to normal DNA synthesis.
- Zinc contributes to normal carbohydrate metabolism.
- Zinc contributes to normal fertility and reproduction.
- Zinc contributes to normal metabolism of fatty acids.
- Zinc contributes to normal protein synthesis.
- Zinc contributes to the maintenance of normal hair.
- Zinc contributes to the maintenance of normal skin.
- Zinc contributes to the maintenance of normal vision.
- Zinc contributes to the protection of cells from oxidative stress.
- Biotin contributes to normal functioning of the nervous system.
- Biotin contributes to normal psychological function.
- Biotin contributes to the maintenance of normal mucous membranes.
- Pantothenic acid contributes to normal energy-yielding metabolism.
- Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.
- Vitamin E contributes to the protection of cells from oxidative stress.
- Zinc contributes to normal acid-base metabolism.
- Zinc contributes to normal cognitive function.
- Zinc contributes to normal macronutrient metabolism.
- Zinc contributes to normal metabolism of vitamin A.
- Zinc contributes to the maintenance of normal bones.
- Zinc contributes to the maintenance of normal nails.
- Zinc contributes to the maintenance of normal testosterone levels in the blood.
- Zinc contributes to the normal function of the immune system.
- Zinc has a role in the process of cell division.

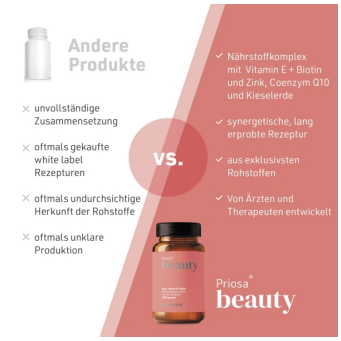

INSIGHTS

MANUFACTURING & QUALITY

Tested quality

Sanopoly develops highly pure nutritional supplements in medically supervised formulations. Production takes place in Austria at an established pharmaceutical contract manufacturer with over 25 years of experience.

ISO 22000

Certified management system for food safety according to international standard.

DEKRA tested

Independent audit of complete quality management by DEKRA.

Laboratory tested

Testing of the ingredients for heavy metals and microbiological purity.

INGREDIENTS

Nutritional values and ingredients

Nutrients	per daily dose * (= 1 Capsules)	% NRV **
Vitamin E	6.3 mg alpha-TE	53
Pantothenic acid (Vit. B5)	62.5 mg	1042
Biotin (Vitamin B7 / B8)	2250 µg	4500
Zinc	3.7 mg	37
Silica	100 mg	–
Coenzyme Q-10	3.7 mg	–
Chlorella microalga	6.2 mg	–
Soya lecithin	1.8 mg	–
Phosphatidylcholine	0.5 mg	–
Borage oil powder	3.75 mg	–
Gamma-linolenic acid	263 µg	–
L-Cysteine	3.7 mg	–
L-Threonine	1.2 mg	–
L-Valine	1.8 mg	–

** per daily dose ** % NRV = nutrient reference values according to Regulation (EU) No 1169/2011. Vitamins and minerals below 15 % NRV are not listed.*

Recommended intake
1 capsule

Ingredients
Filler: cellulose, Silica, Hydroxypropyl methylcellulose (capsule shell), Calcium D-pantothenate, Tocotrienol-tocopherol, Zinc picolinate, Chlorella microalga, L-Cysteine hydrochloride, Sodium chloride, Borage oil powder, Coenzyme Q10, D-Biotin, Modified starch, Soy lecithin, L-Valine, L-Threonine.

Notes
Do not exceed the recommended daily intake. Dietary supplements are not a substitute for a varied diet. A balanced diet and a healthy lifestyle are important. Keep out of reach of children. Store at room temperature (max. 25 °C), dry and protected from light.
