Priosa®

mineral

Bones & Muscles

Complete Mineral Complex, With all important trace elements, With Molybdenum + Calcium + Zinc

100% VEGAN

HIGHEST RAW MATERIAL QUALITY

WITHOUT GENETIC ENGINEERING

PRODUCED IN EUROPE

THE FORMULA

The formula of Priosa® mineral

Complete Mineral Complex, With all important trace elements, With Molybdenum + Calcium + Zinc

24	69	38
Ingredients in the formula	**EU-approved health claims**	**Areas of effect according to approved claims**

WHAT IS

Priosa® mineral in detail

What is Priosa® mineral?

Priosa® mineral is a specially developed mineral complex designed to purposefully supplement our diet with trace elements and micronutrients.

It provides essential building blocks for the function of our central metabolic processes. Essential minerals and trace elements must be obtained from food in sufficient quantities. As structural building blocks as well as in their function as coenzymes, trace elements and micronutrients are indispensable for the building and maintenance of the human organism. Trace elements have important functions especially as components of enzymes and hormones. Moreover, they are significant for the normal course of many biochemical processes in the body. As catalysts, they perform an important transport function and regulate diverse metabolic processes.

WHAT PRIOSA® MINERAL SUPPORTS

The most important of the 38 areas of effect

The vitamins and minerals contained contribute to the following body functions in accordance with EU-approved health claims.

Bones
Calcium is needed for the maintenance of normal **bones**.

Muscle function
Calcium contributes to normal **muscle function**.

Oxidative stress
Copper contributes to the protection of cells from **oxidative stress**.

Cognitive function
Iodine contributes to normal **cognitive function**.

Thyroid
Iodine contributes to the normal production of **thyroid** hormones and normal thyroid function.

Vision
Zinc contributes to the maintenance of normal **vision**.

WHAT CAN

What the nutrients in Priosa® mineral contribute to

- Calcium contributes to normal blood clotting.
- Calcium contributes to normal muscle function.
- Calcium contributes to the normal function of digestive enzymes.
- Calcium is needed for the maintenance of normal bones.
- Chromium contributes to normal macronutrient metabolism.
- Copper contributes to maintenance of normal connective tissues.
- Copper contributes to normal functioning of the nervous system.
- Copper contributes to normal iron transport in the body.
- Copper contributes to the normal function of the immune system.
- Iodine contributes to normal cognitive function.
- Iodine contributes to normal functioning of the nervous system.
- Iodine contributes to the normal production of thyroid hormones and normal thyroid function.
- Iron contributes to normal energy-yielding metabolism.
- Iron contributes to normal oxygen transport in the body.
- Iron contributes to the reduction of tiredness and fatigue.
- Magnesium contributes to a reduction of tiredness and fatigue.
- Magnesium contributes to normal energy-yielding metabolism.
- Magnesium contributes to normal muscle function.
- Magnesium contributes to normal psychological function.
- Calcium contributes to normal energy-yielding metabolism.
- Calcium contributes to normal neurotransmission.
- Calcium has a role in the process of cell division and specialisation.
- Calcium is needed for the maintenance of normal teeth.
- Chromium contributes to the maintenance of normal blood glucose levels.
- Copper contributes to normal energy-yielding metabolism.
- Copper contributes to normal hair pigmentation.
- Copper contributes to normal skin pigmentation.
- Copper contributes to the protection of cells from oxidative stress.
- Iodine contributes to normal energy-yielding metabolism.
- Iodine contributes to the maintenance of normal skin.
- Iron contributes to normal cognitive function.
- Iron contributes to normal formation of red blood cells and haemoglobin.
- Iron contributes to the normal function of the immune system.
- Iron has a role in the process of cell division.
- Magnesium contributes to electrolyte balance.
- Magnesium contributes to normal functioning of the nervous system.
- Magnesium contributes to normal protein synthesis.
- Magnesium contributes to the maintenance of normal bones.

- Magnesium contributes to the maintenance of normal teeth.
- Magnesium has a role in the process of cell division.
- Manganese contributes to normal energy-yielding metabolism.
- Manganese contributes to the maintenance of normal bones.
- Manganese contributes to the normal formation of connective tissue.
- Manganese contributes to the protection of cells from oxidative stress.
- Molybdenum contributes to normal sulphur amino acid metabolism.
- Selenium contributes to normal spermatogenesis.
- Selenium contributes to the maintenance of normal hair.
- Selenium contributes to the maintenance of normal nails.
- Selenium contributes to the normal function of the immune system.
- Selenium contributes to the normal thyroid function.
- Selenium contributes to the protection of cells from oxidative stress.
- Zinc contributes to normal DNA synthesis.
- Zinc contributes to normal acid-base metabolism.
- Zinc contributes to normal carbohydrate metabolism.
- Zinc contributes to normal cognitive function.
- Zinc contributes to normal fertility and reproduction.
- Zinc contributes to normal macronutrient metabolism.
- Zinc contributes to normal metabolism of fatty acids.
- Zinc contributes to normal metabolism of vitamin A.
- Zinc contributes to normal protein synthesis.
- Zinc contributes to the maintenance of normal bones.
- Zinc contributes to the maintenance of normal hair.
- Zinc contributes to the maintenance of normal nails.
- Zinc contributes to the maintenance of normal skin.
- Zinc contributes to the maintenance of normal testosterone levels in the blood.
- Zinc contributes to the maintenance of normal vision.
- Zinc contributes to the normal function of the immune system.
- Zinc contributes to the protection of cells from oxidative stress.
- Zinc has a role in the process of cell division.

INSIGHTS

Images

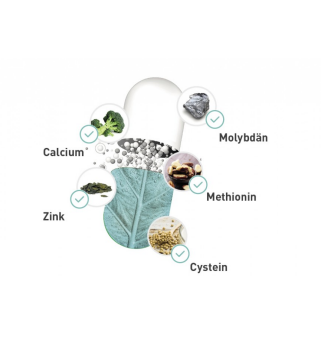

MANUFACTURING & QUALITY

Tested quality

Sanopoly develops highly pure nutritional supplements in medically supervised formulations. Production takes place in Austria at an established pharmaceutical contract manufacturer with over 25 years of experience.

ISO 22000

Certified management system for food safety according to international standard.

DEKRA tested

Independent audit of complete quality management by DEKRA.

Laboratory tested

Testing of the ingredients for heavy metals and microbiological purity.

Nutritional values and ingredients

Nutrients	per daily dose * (= 4 Capsules)	% NRV **
Calcium	250 mg	31
Magnesium	128 mg	34
Iron	6.3 mg	45
Zinc	13.5 mg	135
Copper	1.4 mg	140
Manganese	1.8 mg	90
Selenium	32 µg	58
Chromium	32 µg	80
Molybdenum	16 µg	32
Kelp seaweed extract	100 mg	–
Iodine	100 µg	67
Iodine	100 µg	67
Sodium	39 mg	–
Boron	1.1 mg	–
L-Methionine	60 mg	–
L-Cysteine	21.7 mg	–
Bamboo extract	40 mg	–
Silicon	14 mg	–

** per daily dose ** % NRV = nutrient reference values according to Regulation (EU) No 1169/2011. Vitamins and minerals below 15 % NRV are not listed.*

Recommended intake
Take 4 capsules once daily with sufficient liquid.

Ingredients
Sango Mineral Powder, Calcium citrate, Hydroxypropyl methylcellulose (capsule shell), Corn starch, Potassium chloride, Magnesium bisglycinate, Magnesium citrate, Sodium Bicarbonate, Kelp seaweed extract, Sodium fluoride, L-Methionine, Iron Gluconate, Bamboo Extract, L-Cysteine hydrochloride, Sodium chloride, Manganese Gluconate, Zinc bisglycinate, Zinc citrate, Zinc gluconate, Zinc picolinate, Sodium borate, Sodium selenite, Copper Sulfate, Chromium(III) Chloride, Sodium molybdate, Potassium Iodide.

Notes
Do not exceed the recommended daily intake. Dietary supplements are not a substitute for a varied diet. A balanced diet and a healthy lifestyle are important. Keep out of reach of small children. Store at room temperature (max. 25 °C), dry and protected from light. Moisture-sensitive product. Please do not remove the desiccant sachet contained. The desiccant sachet is not suitable for consumption.
The product is not suitable for children and adolescents. Further consumption of zinc-containing dietary supplements should be avoided.
