WHAT IS

Priosa® immun in detail

What is Priosa® immun?

Priosa® immun is a purely plant-based vital nutrient complex specifically tailored to cover daily vitamin requirements. The vitamins contained contribute to normal immune system function and to many vitamin-dependent metabolic processes. Priosa® immun contains, among other things, more than 50 bioactive nutrients, 13 vitamins, 42 plant extracts and 2 cofactors, folic acid and turmeric. Priosa® immun supplements daily vitamin supply with 13 vitamins from plant sources.

WHAT PRIOSA® IMMUN SUPPORTS

The most important of the 49 areas of effect

The vitamins and minerals contained contribute to the following body functions in accordance with EU-approved health claims.

Immune system
Folate contributes to the normal function of the **immune system**.

Energy metabolism
Biotin contributes to normal energy-yielding metabolism.

Oxidative stress
Manganese contributes to the protection of cells from **oxidative stress**.

Skin
Biotin contributes to the maintenance of normal **skin**.

Mucous membrane
Biotin contributes to the maintenance of normal **mucous membranes**.

Iron metabolism
Riboflavin contributes to the normal metabolism of iron.

WHAT CAN

What the nutrients in Priosa® immun contribute to

- Biotin contributes to normal energy-yielding metabolism.
- Biotin contributes to normal macronutrient metabolism.
- Biotin contributes to the maintenance of normal hair.
- Biotin contributes to the maintenance of normal skin.
- Folate contributes to normal amino acid synthesis.
- Folate contributes to normal homocysteine metabolism.
- Folate contributes to the normal function of the immune system.
- Folate has a role in the process of cell division.
- Iodine contributes to normal energy-yielding metabolism.
- Iodine contributes to the maintenance of normal skin.
- Manganese contributes to normal energy-yielding metabolism.
- Manganese contributes to the normal formation of connective tissue.
- Niacin contributes to normal energy-yielding metabolism.
- Niacin contributes to normal psychological function.
- Niacin contributes to the maintenance of normal skin.
- Pantothenic acid contributes to normal energy-yielding metabolism.
- Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.
- Biotin contributes to normal functioning of the nervous system.
- Biotin contributes to normal psychological function.
- Biotin contributes to the maintenance of normal mucous membranes.
- Folate contributes to maternal tissue growth during pregnancy.
- Folate contributes to normal blood formation.
- Folate contributes to normal psychological function.
- Folate contributes to the reduction of tiredness and fatigue.
- Iodine contributes to normal cognitive function.
- Iodine contributes to normal functioning of the nervous system.
- Iodine contributes to the normal production of thyroid hormones and normal thyroid function.
- Manganese contributes to the maintenance of normal bones.
- Manganese contributes to the protection of cells from oxidative stress.
- Niacin contributes to normal functioning of the nervous system.
- Niacin contributes to the maintenance of normal mucous membranes.
- Niacin contributes to the reduction of tiredness and fatigue.
- Pantothenic acid contributes to normal mental performance.
- Pantothenic acid contributes to the reduction of tiredness and fatigue.

- Riboflavin contributes to normal energy-yielding metabolism.
- Riboflavin contributes to normal functioning of the nervous system.
- Riboflavin contributes to the maintenance of normal mucous membranes.
- Riboflavin contributes to the maintenance of normal red blood cells.
- Riboflavin contributes to the maintenance of normal skin.
- Riboflavin contributes to the maintenance of normal vision.
- Riboflavin contributes to the normal metabolism of iron.
- Riboflavin contributes to the protection of cells from oxidative stress.
- Riboflavin contributes to the reduction of tiredness and fatigue.
- Thiamine contributes to normal energy-yielding metabolism.
- Thiamine contributes to normal functioning of the nervous system.
- Thiamine contributes to normal psychological function.
- Thiamine contributes to the normal function of the heart.
- Vitamin A contributes to normal iron metabolism.
- Vitamin A contributes to the maintenance of normal mucous membranes.
- Vitamin A contributes to the maintenance of normal skin.
- Vitamin A contributes to the maintenance of normal vision.
- Vitamin A contributes to the normal function of the immune system.
- Vitamin A has a role in the process of cell specialisation.
- Vitamin B12 contributes to normal energy-yielding metabolism.
- Vitamin B12 contributes to normal functioning of the nervous system.
- Vitamin B12 contributes to normal homocysteine metabolism.
- Vitamin B12 contributes to normal psychological function.
- Vitamin B12 contributes to normal red blood cell formation.
- Vitamin B12 contributes to the normal function of the immune system.
- Vitamin B12 contributes to the reduction of tiredness and fatigue.
- Vitamin B12 has a role in the process of cell division.
- Vitamin B6 contributes to normal cysteine synthesis.
- Vitamin B6 contributes to normal energy-yielding metabolism.
- Vitamin B6 contributes to normal functioning of the nervous system.
- Vitamin B6 contributes to normal homocysteine metabolism.
- Vitamin B6 contributes to normal protein and glycogen metabolism.
- Vitamin B6 contributes to normal psychological function.
- Vitamin B6 contributes to normal red blood cell formation.
- Vitamin B6 contributes to the normal function of the immune system.
- Vitamin B6 contributes to the reduction of tiredness and fatigue.
- Vitamin B6 contributes to the regulation of hormonal activity.
- Vitamin C contributes to maintain the normal function of the immune system during and after intense physical exercise.
- Vitamin C contributes to normal collagen formation for the normal function of blood vessels.
- Vitamin C contributes to normal collagen formation for the normal function of bones.
- Vitamin C contributes to normal collagen formation for the normal function of cartilage.
- Vitamin C contributes to normal collagen formation for the normal function of gums.
- Vitamin C contributes to normal collagen formation for the normal function of skin.
- Vitamin C contributes to normal collagen formation for the normal function of teeth.
- Vitamin C contributes to normal energy-yielding metabolism.
- Vitamin C contributes to normal functioning of the nervous system.
- Vitamin C contributes to normal psychological function.
- Vitamin C contributes to the normal function of the immune system.
- Vitamin C contributes to the protection of cells from oxidative stress.
- Vitamin C contributes to the reduction of tiredness and fatigue.
- Vitamin C contributes to the regeneration of the reduced form of vitamin E.
- Vitamin C increases iron absorption.
- Vitamin D contributes to normal absorption/utilisation of calcium and phosphorus.
- Vitamin D contributes to normal blood calcium levels.
- Vitamin D contributes to the maintenance of normal bones.
- Vitamin D contributes to the maintenance of normal muscle function.
- Vitamin D contributes to the maintenance of normal teeth.
- Vitamin D contributes to the normal function of the immune system.
- Vitamin D has a role in the process of cell division.
- Vitamin E contributes to the protection of cells from oxidative stress.

- Vitamin K contributes to normal blood clotting.
- Zinc contributes to normal DNA synthesis.
- Zinc contributes to normal carbohydrate metabolism.
- Zinc contributes to normal fertility and reproduction.
- Zinc contributes to normal metabolism of fatty acids.
- Zinc contributes to normal protein synthesis.
- Zinc contributes to the maintenance of normal hair.
- Zinc contributes to the maintenance of normal skin.
- Zinc contributes to the maintenance of normal vision.
- Zinc contributes to the protection of cells from oxidative stress.
- Vitamin K contributes to the maintenance of normal bones.
- Zinc contributes to normal acid-base metabolism.
- Zinc contributes to normal cognitive function.
- Zinc contributes to normal macronutrient metabolism.
- Zinc contributes to normal metabolism of vitamin A.
- Zinc contributes to the maintenance of normal bones.
- Zinc contributes to the maintenance of normal nails.
- Zinc contributes to the maintenance of normal testosterone levels in the blood.
- Zinc contributes to the normal function of the immune system.
- Zinc has a role in the process of cell division.

INSIGHTS

MANUFACTURING & QUALITY

Tested quality

Sanopoly develops highly pure nutritional supplements in medically supervised formulations. Production takes place in Austria at an established pharmaceutical contract manufacturer with over 25 years of experience.

ISO 22000

Certified management system for food safety according to international standard.

DEKRA tested

Independent audit of complete quality management by DEKRA.

Laboratory tested

Testing of the ingredients for heavy metals and microbiological purity.

Nutritional values and ingredients

Nutrients	per daily dose * (= 5 Capsules)	% NRV **
Vitamin A	160 µg	20
Retinyl acetate	80 µg	–
Beta-carotene	80 µg	–
Vitamin D2 equals 500 IE per daily dose	12.5 µg	250
Vitamin D3 equals 800 IE per daily dose	20 µg	400
Vitamin E	30 mg alpha-TE	250
Alpha-tocotrienol	7.78 mg	–
Beta-tocotrienol	0.875 mg	–
Gamma-tocotrienol	9.19 mg	–
Delta-tocotrienol	2.71 mg	–
Vitamin K2	70 µg	93
Vitamin C	425 mg	531
Acerola fruit extract	325 mg	–
Camu camu fruit extract	100 mg	–
Thiamine	15 mg	1364
Riboflavin (Vitamin B2)	3 mg	214
Niacin (Vitamin B3)	40 mg	250
Vitamin B6	10 mg	714
Folic acid (Vitamin B9 / B11)	150 µg	75
Vitamin B12	50 µg	2000
Biotin (Vitamin B7 / B8)	800 µg	1600
Pantothenic acid (Vit. B5)	90 mg	1500
Zinc	5 mg	50
Manganese	5 mg	250
Iodine	30 µg	20
Tagetes flower extract	140 mg	–
Lutein	28 mg	–
Broccoli plant powder	125 mg	–
Alfalfa leaf extract	60 mg	–
Green tea leaf extract	50 mg	–
Polyphenols	30 mg	–
Catechins	17.5 mg	–
EGCG	7.5 mg	–
R-alpha-lipoic acid	50 mg	–
Fennel seed extract	45 mg	–
Para-aminobenzoic acid	45 mg	–
Gentian root extract	40 mg	–
Caraway seed powder	40 mg	–
Wormwood leaf extract	40 mg	–
Sea salt (sodium chloride)	36.5 mg	–
Coenzyme Q-10	35 mg	–
Flaxseed extract	30 mg	–
Lignans	6 mg	–
Brown Algae and Grape Seed Extract	30 mg	–
Turmeric root extract	30 mg	–
Curcuminoids	28.5 mg	–
Sea buckthorn fruit powder	30 mg	–
Carrot powder	25 mg	–
Nettle leaf extract	25 mg	–
Sitosterol	0.5 mg	–

Nutrients	per daily dose * (= 5 Capsules)	% NRV **
Milk thistle seed extract	25 mg	–
Silymarin	20 mg	–
Pomegranate peel extract	25 mg	–
Ellagic acid	10 mg	–
Apple pectin	25 mg	–
Galacturonic acid	16.25 mg	–
Chili fruit powder	25 mg	–
Parsley plant extract	25 mg	–
Beetroot juice powder	25 mg	–
Lycopene (tomato fruit extract)	5 mg	–
Chlorella microalga	20 mg	–
Grape seed extract	20 mg	–
Polyphenols	19 mg	–
OPC	12 mg	–

Apricot seed extract	0.5 mg	–

** per daily dose ** % NRV = nutrient reference values according to Regulation (EU) No 1169/2011. Vitamins and minerals below 15 % NRV are not listed.*

Recommended intake

Take 5 capsules once daily.

Ingredients

Acerola Fruit Extract Blend (Acerola Fruit Extract, L-Ascorbic Acid), Hydroxypropyl methylcellulose (capsule shell), Corn starch, Camu Camu Fruit Extract, Tagetes Flower Extract, Broccoli Plant Powder, Ergocalciferol, Calcium D-pantothenate, Tocotrienol-tocopherol, Alfalfa Leaf Extract, Green Tea Leaf Extract, R-alpha-Lipoic acid, Fennel seed extract, Para-Aminobenzoic Acid, D-alpha-Tocopheryl acetate, Gentian Root Extract, Caraway Seed Powder, Wormwood Leaf Extract, Nicotinamide, Sodium chloride, Coenzyme Q10, Menaquinone, Linseed Extract, Brown Algae Extract and Grape Seed Extract (contains SULPHUR DIOXIDE and SULPHITES), Turmeric root extract, Kelp Algae Fucus Thallus Extract, Sea Buckthorn Fruit Powder, Carrot Powder, Nettle Leaf Extract, Milk thistle seed extract, Pomegranate peel extract, Apple pectin, Chili fruit powder, Parsley plant extract, Red beet juice powder, Lycopene from tomatoes, Chlorella microalga, Grape seed extract, Cranberry fruit extract, Artichoke leaf extract, Thiamine hydrochloride, Bitter orange fruit extract, Zinc citrate, Manganese sulphate, Dandelion root extract, Cyanocobalamin, Sage plant extract, Ginger Root Extract, Shiitake mushroom extract, Pyridoxal 5'-phosphate, Spirulina Platensis powder, Elderberry extract, Blueberry fruit extract, Rosehip shell, ground, Yarrow aerial parts, ground, Nicotinamide adenine dinucleotide, Cholecalciferol, Chamomile flower extract, Pyrroloquinoline quinone disodium salt (PQQ), Beta-Carotene, Aloe vera gel concentrate powder, Sodium riboflavin-5'-phosphate, Riboflavin, Biotin, Retinyl acetate, Apricot seed extract, (6S)-5-methyltetrahydrofolate glucosamine salt, Hydroxocobalamin, Methylcobalamin, 5'-deoxyadenosylcobalamin.

Notes

Do not exceed the recommended daily intake. Food supplements are not a substitute for a varied diet. A balanced diet and healthy lifestyle are important. Keep out of reach of small children. Store at room temperature (max. 25 °C), dry and protected from light. Use within 3 months of opening the package.*
A daily dose of 800 mg EGCG must not be exceeded. The product contains 7.5 mg EGCG per daily dose (= 5 capsules). Should not be consumed if other green tea products are consumed on the same day. Should not be consumed by pregnant or breastfeeding women and children under 18 years of age. Should not be consumed on an empty stomach.
* Exception: packaging units whose daily dose and sales quantity require use over a longer period.
