WHAT IS

Priosa® protect in detail

What is Priosa® protect?

The most important component is the natural enzyme superoxide dismutase (SOD). Priosa® protect contains 12,000 IU/g SOD (per capsule).

Sanopoly has chosen a plant-based substance for Priosa® protect that has a very high, above-average potential: it is derived from bitter melon juice.
Superoxide dismutase is one of the body's most important enzymes.

Oxidative stress refers to an excess of free oxygen radicals in relation to antioxidant substances (antioxidants). Free oxygen radicals lack an electron. Because of this missing electron, free radicals are highly reactive. They attempt to "steal" an electron from atoms or molecules in their environment in order to return to a chemically stable state themselves. In doing so, the attacked substances in the environment are damaged.

WHAT PRIOSA® PROTECT SUPPORTS

The most important of the 28 areas of effect

The vitamins and minerals contained contribute to the following body functions in accordance with EU-approved health claims.

Oxidative stress

Vitamin C contributes to the protection of cells from **oxidative stress**.

Bones

Vitamin C contributes to normal collagen formation for the normal function of **bones**.

Cartilage

Vitamin C contributes to normal collagen formation for the normal function of **cartilage**.

WHAT CAN

What the nutrients in Priosa® protect contribute to

- Vitamin C contributes to maintain the normal function of the immune system during and after intense physical exercise.
- Vitamin C contributes to normal collagen formation for the normal function of bones.
- Vitamin C contributes to normal collagen formation for the normal function of gums.
- Vitamin C contributes to normal collagen formation for the normal function of teeth.
- Vitamin C contributes to normal functioning of the nervous system.
- Vitamin C contributes to the normal function of the immune system.
- Vitamin C contributes to the reduction of tiredness and fatigue.
- Vitamin C increases iron absorption.
- Zinc contributes to normal acid-base metabolism.
- Zinc contributes to normal cognitive function.
- Zinc contributes to normal macronutrient metabolism.
- Zinc contributes to normal metabolism of vitamin A.
- Zinc contributes to the maintenance of normal bones.
- Zinc contributes to the maintenance of normal nails.
- Zinc contributes to the maintenance of normal testosterone levels in the blood.
- Zinc contributes to the normal function of the immune system.
- Zinc has a role in the process of cell division.
- Vitamin C contributes to normal collagen formation for the normal function of blood vessels.
- Vitamin C contributes to normal collagen formation for the normal function of cartilage.
- Vitamin C contributes to normal collagen formation for the normal function of skin.
- Vitamin C contributes to normal energy-yielding metabolism.
- Vitamin C contributes to normal psychological function.
- Vitamin C contributes to the protection of cells from oxidative stress.
- Vitamin C contributes to the regeneration of the reduced form of vitamin E.
- Zinc contributes to normal DNA synthesis.
- Zinc contributes to normal carbohydrate metabolism.
- Zinc contributes to normal fertility and reproduction.
- Zinc contributes to normal metabolism of fatty acids.
- Zinc contributes to normal protein synthesis.
- Zinc contributes to the maintenance of normal hair.
- Zinc contributes to the maintenance of normal skin.
- Zinc contributes to the maintenance of normal vision.
- Zinc contributes to the protection of cells from oxidative stress.

INSIGHTS

MANUFACTURING & QUALITY

Tested quality

Sanopoly develops highly pure nutritional supplements in medically supervised formulations. Production takes place in Austria at an established pharmaceutical contract manufacturer with over 25 years of experience.

ISO 22000

Certified management system for food safety according to international standard.

DEKRA tested

Independent audit of complete quality management by DEKRA.

Laboratory tested

Testing of the ingredients for heavy metals and microbiological purity.

INGREDIENTS

Nutritional values and ingredients

Nutrients	per daily dose * (= 2 Capsules)	% NRV **
Vitamin C	80 mg	100
Zinc	3.5 mg	35
Melon fruit juice concentrate (SOD)	33.3 mg	–
Superoxide Dismutase (SOD)	400 IE	–

** per daily dose ** % NRV = nutrient reference values according to Regulation (EU) No 1169/2011. Vitamins and minerals below 15 % NRV are not listed.*

Recommended intake
Take 1-2 capsules once daily with sufficient liquid.

Ingredients
Corn starch, Hydroxypropyl methylcellulose (capsule shell), Calcium L-ascorbate, Melon fruit juice concentrate, Zinc citrate, Sodium chloride.

Notes
Do not exceed the recommended daily intake. Dietary supplements are not a substitute for a varied diet. A balanced diet and a healthy lifestyle are important. Keep out of reach of small children. Store at room temperature (max. 25 °C), dry and protected from light. Consume within 3 months of opening the packaging.*
* Exception: Packaging units whose daily dose and sales quantity require intake over a longer period of time.
