Areas of effect according to approved claims

WHAT IS

Priosa® biotics in detail

What is Priosa® biotics?

Priosa® biotics combines two coordinated capsules. The yellow capsule contains plant-based and mineral fiber as well as vitamins and minerals. The white capsule contains inulin from chicory and 16 different bacterial strains (13.6 billion CFU per daily dose). Vitamin D, B6, B12 and folate contribute to normal immune system function.

The combination is based on many years of practical experience from Sanopoly experts and contains selected bacterial culture strains.

WHAT PRIOSA® BIOTICS SUPPORTS

The most important of the 27 areas of effect

The vitamins and minerals contained contribute to the following body functions in accordance with EU-approved health claims.

Immune system
Folate contributes to the normal function of the **immune system**.

Energy metabolism
Biotin contributes to normal energy-yielding metabolism.

Tiredness and fatigue
Folate contributes to the reduction of **tiredness and fatigue**.

Hormonal activity
Vitamin B6 contributes to the regulation of **hormonal activity**.

Nervous system
Biotin contributes to normal functioning of the **nervous system**.

Skin
Biotin contributes to the maintenance of normal **skin**.

WHAT CAN

What the nutrients in Priosa® biotics contribute to

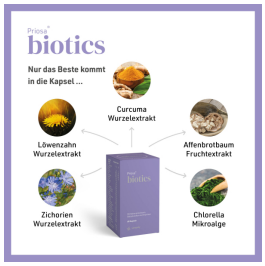

- Biotin contributes to normal energy-yielding metabolism.
- Biotin contributes to normal macronutrient metabolism.
- Biotin contributes to the maintenance of normal hair.
- Biotin contributes to the maintenance of normal skin.
- Folate contributes to normal amino acid synthesis.
- Folate contributes to normal homocysteine metabolism.
- Folate contributes to the normal function of the immune system.
- Folate has a role in the process of cell division.
- Magnesium contributes to electrolyte balance.
- Magnesium contributes to normal functioning of the nervous system.
- Magnesium contributes to normal protein synthesis.
- Magnesium contributes to the maintenance of normal bones.
- Magnesium has a role in the process of cell division.
- Pantothenic acid contributes to normal mental performance.
- Pantothenic acid contributes to the reduction of tiredness and fatigue.
- Vitamin B12 contributes to normal functioning of the nervous system.
- Vitamin B12 contributes to normal psychological function.
- Vitamin B12 contributes to the normal function of the immune system.
- Vitamin B12 has a role in the process of cell division.
- Biotin contributes to normal functioning of the nervous system.
- Biotin contributes to normal psychological function.
- Biotin contributes to the maintenance of normal mucous membranes.
- Folate contributes to maternal tissue growth during pregnancy.
- Folate contributes to normal blood formation.
- Folate contributes to normal psychological function.
- Folate contributes to the reduction of tiredness and fatigue.
- Magnesium contributes to a reduction of tiredness and fatigue.
- Magnesium contributes to normal energy-yielding metabolism.
- Magnesium contributes to normal muscle function.
- Magnesium contributes to normal psychological function.
- Magnesium contributes to the maintenance of normal teeth.
- Pantothenic acid contributes to normal energy-yielding metabolism.
- Pantothenic acid contributes to normal synthesis and metabolism of steroid hormones, vitamin D and some neurotransmitters.
- Vitamin B12 contributes to normal energy-yielding metabolism.
- Vitamin B12 contributes to normal homocysteine metabolism.
- Vitamin B12 contributes to normal red blood cell formation.
- Vitamin B12 contributes to the reduction of tiredness and fatigue.
- Vitamin B6 contributes to normal cysteine synthesis.

- Vitamin B6 contributes to normal energy-yielding metabolism.
- Vitamin B6 contributes to normal functioning of the nervous system.
- Vitamin B6 contributes to normal homocysteine metabolism.
- Vitamin B6 contributes to normal protein and glycogen metabolism.
- Vitamin B6 contributes to normal psychological function.
- Vitamin B6 contributes to normal red blood cell formation.
- Vitamin B6 contributes to the normal function of the immune system.
- Vitamin B6 contributes to the reduction of tiredness and fatigue.
- Vitamin B6 contributes to the regulation of hormonal activity.
- Vitamin D contributes to normal absorption/utilisation of calcium and phosphorus.
- Vitamin D contributes to normal blood calcium levels.
- Vitamin D contributes to the maintenance of normal bones.
- Vitamin D contributes to the maintenance of normal muscle function.
- Vitamin D contributes to the maintenance of normal teeth.
- Vitamin D contributes to the normal function of the immune system.
- Vitamin D has a role in the process of cell division.

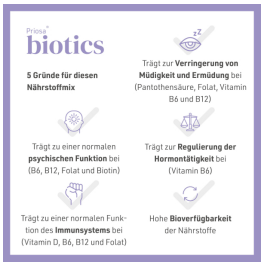

INSIGHTS

MANUFACTURING & QUALITY

Tested quality

Sanopoly develops highly pure nutritional supplements in medically supervised formulations. Production takes place in Austria at an established pharmaceutical contract manufacturer with over 25 years of experience.

ISO 22000

Certified management system for food safety according to international standard.

DEKRA tested

Independent audit of complete quality management by DEKRA.

Laboratory tested

Testing of the ingredients for heavy metals and microbiological purity.

Nutritional values and ingredients

Nutrients	per daily dose * (= 4 Capsules)	% NRV **
Vitamin D3 equals 800 IE per daily dose	20 µg	400
Vitamin B6	2 mg	143
Folic acid (Vitamin B9 / B11)	1200 µg	600
Vitamin B12	200 µg	8000
Biotin (Vitamin B7 / B8)	2000 µg	4000
Pantothenic acid (Vit. B5)	40 mg	667
Magnesium	60 mg	16
Sodium	10 mg	–
Mineral powder	170 mg	–
L-Cysteine	40 mg	–
Glycine	25 mg	–
L-Glutamic acid	20 mg	–
Turmeric root extract Curcuminoids	140 mg 133 mg	– –
Peat powder	100 mg	–
Beta-glucan	60 mg	–
Chicory root extract Inulin	40 mg 36 mg	– –
Gum acacia	37.5 mg	–
Chlorella microalga	34 mg	–
Dandelion root extract Flavonoids	31.2 mg 0.625 mg	– –
Chamomile flower extract	20 mg	–
Baobab fruit extract	15 mg	–
Myrrh ground	15 mg	–
Fennel seed extract	12.5 mg	–
Flaxseed extract Lignans	3.75 mg 0.75 mg	– –
Chicory root extract Inulin	386.6 mg 348 mg	– –
Bacterial culture blend equals 13,6 Mrd. KBE per daily dose	140 mg	–

** per daily dose ** % NRV = nutrient reference values according to Regulation (EU) No 1169/2011. Vitamins and minerals below 15 % NRV are not listed.*

Recommended intake

Priosa®PRE Capsule: Take 1 capsule twice daily with sufficient liquid.
Priosa®PRO Capsules: Take 1 capsule twice daily each with sufficient liquid.

Ingredients

Magnesium bisglycinate, Hydroxypropyl methylcellulose (capsule shell), Mineral powder, Turmeric root extract, Moor powder, Beta glucan from Saccharomyces cerevisiae, Filler: microcrystalline cellulose, L-Cysteine hydrochloride, Calcium D-pantothenate, Chicory root extract, Gum acacia, Chlorella microalga, Dandelion root extract, Sodium chloride, Glycine, Chamomile flower extract, L-Glutamic acid, Baobab fruit extract, Myrrh ground, Fennel seed extract, Cholecalciferol, Flaxseed extract, Zinc citrate, (6S)-5-Methyltetrahydrofolate – glucosamine salt, Pyridoxal 5'-phosphate, D-Biotin, Methylcobalamin, Chicory root extract, Bacterial culture blend (Bifidobacterium lactis THT 010801, Enterococcus faecium THT 020101, Bifidobacterium longum THT 010301, Lactococcus lactis THT 090101, Ligilactobacillus salivarius THT 031001, Lactobacillus bulgaricus THT 030301, Levilactobacillus brevis THT 030201, Bifidobacterium bifidum THT 010101, Bifidobacterium breve THT 010602, Lactobacillus acidophilus THT 030101, Lactiplantibacillus plantarum THT 030707, Bifidobacterium infantis THT 010201, Lacticaseibacillus casei THT 030401, Limosilactobacillus reuteri THT 030802, Bacillus coagulans THT 600201, Streptococcus thermophilus THT 070102), Potato starch, Hydroxypropyl methylcellulose (capsule shell).

Notes

Do not exceed the recommended daily intake. Dietary supplements are not a substitute for a varied diet. A balanced diet and a healthy lifestyle are important. Keep out of reach of small children. Store at room temperature (max. 25 °C), dry and protected from light. Consume within 3 months of opening the packaging.*
Persons undergoing laboratory tests should inform their doctor or laboratory staff that biotin is being taken or has recently been taken. The product is not suitable for children under 12 years of age, pregnant women and nursing mothers. The product is not recommended for gastric ulcers, liver damage or bile duct obstruction, edematous heart or kidney insufficiency. Consultation with your doctor/pharmacist is recommended when taking anticoagulants simultaneously.
* Exception: Packaging units whose daily dose and sales quantity require intake over a longer period of time.
